PROFILE SUMMARY

Accomplished data analyst with a focus on utilizing Power BI to solve the full potential of data-driven decision-making. Data-driven problem solver and proficient in crafting visually compelling Power BI reports and dashboards that unlock actionable insights.

EDUCATION

2013 - 2017
JEPPIAAR SRR ENGG. COLLEGE
B.E (MECHANICAL ENGINEERING)

EXPERIENCE

WORK EXPERIENCE - 5 + YEARS.
Currently working in **TECH MAHINDRA**
as a **Senior BI Developer**
(From 2020 to Till Date).
Initially worked in **Atos| Syntel**
(From 2019 to 2020) - (1.2 Years)
as a **Software Executive**

EXPERTISE

- Power BI Desktop
- Power Query Editor
- Power BI service
- Data Visualization
- DAX Calculations
- Data Modelling
- SQL Oracle

LANGUAGES

- ENGLISH
- TAMIL

PROFESSIONAL SUMMARY

- I am having **5+ Years of experience** in **Microsoft POWER BI** and **SQL**.
- Experienced in Data transformation techniques using **Power Query editor**.
- Experienced in creating and implementing Data modelling using **Append, Merge and Relationships** in Power BI.
- Experience in Power BI Reports using different **DAX queries, visuals, filters**, and configuring Dashboards with **drill-down Capabilities**.
- Specialized in Creating Visualization using Different Charts and customs charts in Power BI Skilled in Creating Interactive Reports and Dashboards in Power BI.
- Experienced in the creation of different **calculated tables, Calculated Columns and Calculated Measures** using DAX Iterative functions.
- Experienced in Implementing **Row Level Security and Object Level Securities** both Static and Dynamic Using DAX in Power BI.
- Experienced in **Implementing Incremental and Full Refresh** and Scheduling them in Power BI.
- Published and Shared Reports using Power BI Service.
- Experienced in **Implementing Gateways** and Knowledge in Workspace Roles in Power BI Service.
- Good in Writing DAX functions/Queries as well in Power BI. Knowledge in Writing SQL Queries using Joins, Views etc. to get data into Power BI.
- Experienced in the **creation of different Visualizations** like Line, Bar, Table, Pie, Matrix table, Area, Tree map, Waterfall, Funnel, Clustered and Stacked and many other Visualizations.

PROJECT 3:

DURATION - 2022-Till Date

- **CLIENT** - THAME Laboratories
- **DOMAIN** - Pharmaceutical
- **SKILLS** - Power BI, SQL and Power Query Editor, Power BI Services.

DESCRIPTION

THAME Laboratories is one of the leading UK Pharmaceutical Companies specializing in the development, licensing, manufacture and marketing of liquid medicines.

ROLES & RESPONSIBILITIES:

- Interacting with design & analysis team to understand business requirement and complexity of Reports.
- Analysis and development of complex Reports, Dashboards and DAX Queries.
- Create charts and data documentation with explanations of algorithms, parameters, models, and relationships.
- Understanding of the data, use filters and visualizations to Analyze current ETL procedures to define and create new systems.
- Effectively use Power Query and DAX for calculations.
- Extensive experience developing real world Power BI dashboards - Working knowledge in DAX and M language.
- Define key performance indicators KPIs with specific objectives and track them regularly Analyze data and display it in reports to aid decision-making.
- Ensuring data security and refresh schedules are implemented.

PROJECT 2:

DURATION - 2020-2022 (1.8 Years)

- **CLIENT** - FARMFOODS
- **DOMAIN** - SALES
- **SKILLS** - Power BI, SQL and Oracle.

DESCRIPTION

Farmfoods is a British frozen food and grocery supermarket chain based in Cumber auld, Scotland. It is owned by Eric Herd, and has over three hundred shops in the United Kingdom, of which more than a hundred are in Scotland.

ROLES & RESPONSIBILITIES:

- To Identify business needs and translate them into actionable data requirements.
- Working closely with the Power BI developers to understand data availability and limitations.
- Validating reports and dashboards to ensure they meet business objectives.
- Analysis and development of complex Reports, Dashboards and DAX Queries.
- To Create charts and data documentation with explanations of algorithms, parameters, models and relationships.
- To have a Clear Understanding of the data, use filters and visualizations to Analyze current ETL procedures to define and create new systems.
- Planning and managing the project timeline, budget, and resources.
- Performing data analysis and identifying key trends and patterns.
- Ensure data security and refresh schedules are implemented.

- Tracking project progress and reports on successes and challenges.
- As a Power BI developer I build data models, dashboards, and reports
- Effectively use Power Query and DAX for calculations.
- Define key performance indicators KPIs with specific objectives and track them regularly Analyze data and display it in reports to aid decision-making.

PROJECT 1:

DURATION - 2019-2020 (1.2 Years)

- **CLIENT** – Johnson & Johnson
- **DOMAIN** – Sales and Manufacturing
- **SKILLS** – Power BI, SQL and SharePoint.

DESCRIPTION

This project aims to develop a comprehensive Business Intelligence (BI) solution for Johnson & Johnson's (J&J) Sales and Manufacturing divisions to improve product availability, streamline production efficiency, and enhance sales performance insights. J&J, as a global leader in healthcare products, requires advanced BI tools to monitor and optimize production processes, track sales across regions and products, and ensure data-driven decision-making.

ROLES & RESPONSIBILITIES:

- To Validate reports and dashboards to ensure they meet business objectives.
- To Plan and manage the project timeline, budget, and resources.
- Performing data analysis and identifying key trends and patterns.
- Involved in Creating Calculated Columns and Calculated Measures and Doing DAX.
- Creating Visuals and Reports in Power BI Desktop and publish into Power BI Service.
- Worked on Parameters, Table Calculations and Hierarchies.
- Generated reports using DAX Time intelligence functions and other kind of DAX functions.
- Sharing reports and Dashboards and Scheduling using Gateway in Power BI Service.
- Giving Insights to Clients based on the Requirements.
